?? [HOT] PlayStore Carding Method ??

1???. If you wanna card Google play and Google play gift card
As usual clear your Cookies in browser via CCleaner.
[According to the BIN, we have mentioned the IP below]

2???. Then go to any app that is paid and below like 2\$ or less , go to payment info.

3???. Get your live CC from cc sellers or buy from shop like unicc, jstash etc...,

4???. Bin recommended 517805,372739 ,417409 or amex gold ,capital one bank (only USA cc)

5???. If you going for public cc I recommend Amex, are good for PlayStore & God knows the best :|

? Even if the card dont have name and zip you can add any name and us zip because those bin are Non-AVS
[Non-AVS means the BIN don't have Address Verification System]

6???. Now save the card and ready to pay

7???. If the payment successful for that app, then go to buy google play credit and select your gift card 5\$,10\$,15\$,25\$ or 50\$.

8???. Now all done and it will success mostly because of Non-AVS BIN.

9???. Even if card declined after use, Google play never charge back and card showing declined will always work for small amount like 5\$ after few weeks.

Thats it, Hope you Enjoyed!??

(How Can We Hide The File In Image)

1. Gather the file you wish to bind, and the image file, and place them in a folder. I will be using C:\New Folder

-The image will hereby be referred to in all examples as xyz.jpg

--The file will hereby be referred to in all examples as New Text Document.txt

2. Add the file/files you will be injecting into the image into a WinRar .rar or .zip. From here on this will be referred to as (secret.rar)

3. Open command prompt by going to Start > Run > cmd

4. In Command Prompt, navigate to the folder where your two files are by typing

5. cd location [ex: cd C:\New Folder]

5. Type [copy /b xyz.jpg + secret.rar xyz.jpg] (remove the brackets)

Congrats, as far as anyone viewing is concerned, this file looks like a JPEG, acts like a JPEG, and is a JPEG, yet it now contains your file.

In order to view/extract your file, there are two options that you can take

a) Change the file extension from xyz.jpg to xyz.rar, then open and your file is there.

b) Leave the file extension as is, right click, open with WinRAR and your file is there.
